

ADTB 2019

Workshop on Advanced Diffraction Techniques for Biology

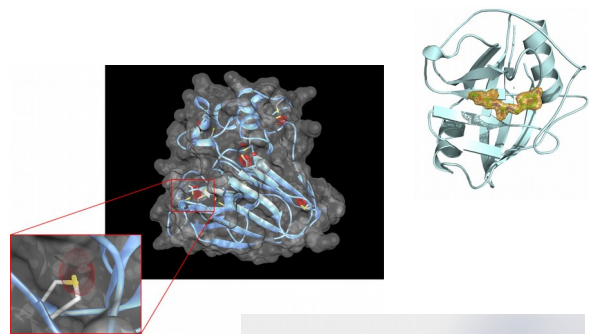

19-22 Nov. 2019
EPN, Grenoble, France

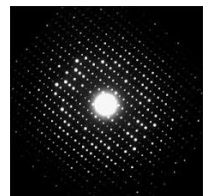

A 4-day course that covers theoretical and practical aspects of advanced techniques in diffraction, such as:

- Crystal growth
- In situ diffraction
- Serial crystallography
- Time resolved crystallography
- Neutron diffraction
- Electron diffraction on nano-crystals

This course will be organized in Grenoble (EPN Campus), with presentations at the IBS and practicals at the EMBL/CIBB, ILL, ESRF^(*) and IBS

(*) due to the ESRF-EBS upgrade, there will be no practicals on beamlines at the ESRF this year

Application:

send a short CV (1 page max.) and a motivation letter,
to: marta.elzo-aizarna@ibs.fr
before 30 September 2019
